

Term 3

Designing, prototyping and building solutions for problems

DETAILS

This course is for those new to 3D Printing and coding. You will use Tinkercad and Thingiverse to design a solution for a problem or issue you have identified. Once the design is completed, your prototype will be 3D printed and tested. You will get the chance to test your coding skills and integrate micro:bits and littleBits into your designs where possible. Who knows, your invention could make life easier for millions of people?

WHAT TO BRING

All students should bring in recess and lunch, a water bottle and hat.
